

Subject Index to Volume 39

A

Acetate

metabolism, effects of propionate on, H2197

Acetylcholine

inhibition of nitric oxide, and atrial natriuretic factor secretion in isolated rat heart, H306

local release, and nitric oxide-dependent flow-induced vasodilation in vitro, H442

and myocardial contractility, in situ canine hearts, H1568

negative inotropic effect of, in frog heart, H1178

vascular reactivity to, exercise training and, H2008

Acinar cells

pancreatic, oxygen transfer to, H1704

Actin-myosin reaction

CGP-48506 and, H24

Action potentials

monophasic, recording in vivo, novel guinea pig heart model for, H1850
in sinoatrial node pacemaker cells, sodium currents and, H2108

Adenosine

analogues, effects on tension and cytosolic calcium in porcine coronary artery, H134

in atrioventricular nodal conduction, studied in vivo, novel guinea pig heart model for, H1850

formation in ischemic heart, 5'-nucleotidase activity and, H1493

interstitial concentration, estimation, for canine heart, H1469

kinetics, in canine coronary circulation, H1469

myocardial, aging and, H897

and myocardial contractility, in situ canine hearts, H1568

in regulation of coronary blood flow, in nitric oxide-inhibited dogs, H423

Adenosine 3',5'-cyclic monophosphate

analogue, and sodium channel development, H194

and endothelial adhesion molecules, H807

production, CGRP receptor-coupled, for dilation of pial arterioles, H317

and sodium channel development, H194

vascular smooth muscle, and angiotensin II-induced vasoconstriction, H1914

Adenosine diphosphate

secretion from platelet dense granules, and platelet aggregation, H1131

Adenosine receptors

A₁ and A_{2a}

mediation of tone-dependent responses in feline pulmonary vascular bed, H200

pharmacological probes for, in feline pulmonary vascular bed in vivo, H610

sensitivity, age-related changes in, rat heart, H897

A_{2a}, characterization in adult rat ventricular myocyte, H1655

Adenosine 5'-triphosphate

see also Potassium channels, ATP-sensitive

cerebrovascular effects, mechanisms, H1423

negative chronotropic action in canine heart, H1785

in sequential ischemia/reperfusion, and contralateral skeletal muscle salvage, H1407

use during graded hypoxia, developmental changes in, in heart in vivo, H216

β -Adrenergic blockers

effects on skeletal muscle fiber types in dogs with moderate heart failure, H115

α -Adrenergic receptors

α_1 -

density in cerebral arteries, inositol phosphate response to, H915

stimulation in cat papillary muscles, negative lusitropic effect of, H701

in uterine artery, effects of long-term high-altitude hypoxemia on, H1001

activation during exercise, reversal of pulmonary vasoconstriction induced by, H875

subtypes, mediation of constriction in microvessels, H710

β -Adrenergic receptors

β_1 -, and ATP-sensitive potassium channels, in canine coronary circulation, H2210

stimulation, in lymphatic smooth muscle of guinea pig mesentery, H1687

Afterdepolarizations

delayed, recording in vivo, novel guinea pig heart model for, H1850

early, recording in vivo, novel guinea pig heart model for, H1850

Aging

effect on myocardial adenosine, in rat heart, H897

effect on relationships between lung volume and heart rate, H1825

mouse model of, noninvasive indexes of cardiac systolic and diastolic function in, H2204

Alkalosis

hypocapnic, and myocardial energetics, H1905

Allopurinol

effects on cyclic flow variations, in canine coronary arterial thrombosis, H1993

effects on platelet aggregation, H1993

Altitude, high

hypoxemia at, effects on α_1 -adrenergic receptors in uterine artery, in sheep, H1001

γ -Aminobutyric acid

in sympathetic circuits in spinal cord, and baroreceptor reflex, H1885

3-Aminotriazole

effect on hyperthermia-mediated cardioprotection in rabbits, H1165

Anemia

cerebral blood flow in, H466

Anesthesia

pentobarbital, cardiovascular fluctuations during, H575

Anesthetics

vapor, and rapid cooling contracture in skinned myocardium, H1662

Angiogenesis

cardiac

fetal, H33

vascular endothelial growth factor in, H1791, H1803

shear stress and, H364

vascular endothelial growth factor in, nitric oxide and, H411

Angiotensin-converting enzyme inhibitors

effects on skeletal muscle fiber types in dogs with moderate heart failure, H115

hemodynamic effects in heart failure, bradykinin pathway in, H1985

structural and functional effects in injured arteries, nitric oxide synthesis and, H298

Angiotensin I

ANG I-(3-10), responses to, in hind-limb vascular bed of cat, H1172

Angiotensin II

and cardiomyocyte contraction, H2060

central pressor action of, centrally released vasopressin and, H167

cerebral, effects on sympathoexcitatory and pressor responses to sodium and ouabain, in brain, H275

effects on cardiac fibroblasts, comparison with effects of other growth factors, H2100

effects on prostacyclin and nitric oxide production in pregnancy, H1914

inhibition of nitric oxide, and atrial natriuretic factor secretion in isolated rat heart, H306

modulation of calcium transients in cardiomyocytes, H857

vascular reactivity to, exercise training and, H2008

Angiotensin II receptors

AT₁, in cardiac fibroblasts, H2100

Annexins

annexin VI, overexpression in heart, and cardiomyocyte function, in transgenic mice, H1091

Anoxia

effects on glutamate transport and metabolism in cardiomyocytes, H1825

Ansa subclaviae

stimulation, and heart rate, H2081

Antiarrhythmic drugs

mechanism of action, H2157

Antioxidants

effects on vascular injury caused by oxygen-derived free radicals, H2184

Aorta

baroreceptor reflex, central arc, transfer function analysis of, H1054

distensibility and compliance, assessment technique, in rats, H780

endothelial injury in vivo, H1841

Aorta (continued)

- glyceraldehyde-3-phosphate dehydrogenase expression in, oxidative stress and, in rabbit, H81
- sodium pump activity, differential stimulation by insulin and nitric oxide, in rabbit, H1278
- systolic and diastolic pressure, determinants of, H2050
- transverse residual strains in, direct measurement of, H750

Aquaporin-1

- in lung endothelium, and water transport, H416

Arachidonic acid

- effects on ATP-sensitive potassium channels of coronary smooth muscle cells, H1957
- endothelium-derived metabolite of, vasorelaxant effect, H1021
- metabolism, and acute lung injury, H1355

Arginine vasopressin, see Vasopressin**Arrhythmias**

- atrial, pathophysiology, H2157
- myocardial response to adenosine and, age-related changes in, in rat heart, H897
- reperfusion, pathophysiology, H957
- ventricular, studied in vivo, novel guinea pig heart model for, H1850

Arteries

- cerebral, *see Cerebral arteries*
- compliance, and carotid baroreflex function, H988
- coronary, *see Coronary arteries*
- elasticity, and left ventricular mass, H981
- impedance, blood volume changes and, in chick embryo, H1597
- injured, structural and functional effects of ACE inhibitors in, nitric oxide synthesis and, H298
- remodeling, in response to locally altered blood pressure, indicial functions of, H1323
- resistance, contraction, vitamin D and, H230
- systemic, endothelial vasodilator production by, H1914
- uterine, endothelial vasodilator production by, H1914

Arterioles*see also Microvasculature*

- cerebral
 - endothelium-dependent responses of, laser-dye impairment of, singlet oxygen and, H1258
 - responses to *N*-methyl-D-aspartate, in piglets, effects of ischemia on, H1225
- constriction, mediation by α -adrenoceptor subtypes, H710
- coronary, vasodilation of
 - endothelium-dependent, platelet-activating factor and, H2094
 - flow-induced, H1878
- endothelial depolarization in, ratiometric measurement of, with potential-sensitive dye, H2216
- pial
 - dilation, calcitonin gene-related peptide receptors and, H317
 - shear and flow rates in, during somatosensory stimulation, H1712

- skeletal muscle, insulin-induced vasodilation in, H2120

Athletes

- vascular reactivity in, and plasma cholesterol levels, H2008

Atrial cells

- muscarinic potassium channels, regulation by cytosolic protein, H526

Atrial natriuretic factor/Atrial natriuretic peptide

- cerebral, after myocardial infarction, in rat, H312
- endogenous, inhibition of endothelin-1, H1819
- release, neurokinin-induced, in neonatal rat ventricular cardiomyocytes, H935
- response to acute and chronic ventricular pacing in sheep, H594
- secretion in isolated rat heart, nitric oxide inhibition and, H306

Atrioventricular node

- conduction and triggered activity, studied in vivo, novel guinea pig heart model for, H1850
- transient responses, effects of heart rate history on, H2070

Autonomic nervous system

- cardiac activity, psychosocial influences upon, H1381
- in mediation of heart rate variability, H1825, H2081
- regulation of blood pressure variability, in rats, H2143

Autoregressive moving average analysis

- for characterizing baroreflex gain, H1240

Autoregulation

- in vertebralbasilar system, H1350

B**Baroreceptor reflexes**

- aortic, central arc, transfer function analysis of, H1054
- arterial, afferent signals in hemodynamic response to hypovolemia, H1538
- cardiopulmonary, in regulation of blood pressure and heart rate during exercise, H2132
- carotid
 - arterial compliance and, H988
 - in hemodynamic responses to acute central hypovolemia, H1538
 - in regulation of blood pressure and heart rate during exercise, H2132
 - control of arterial pressure, mathematical model of, H651
- gain, characterization using autoregressive moving average analysis, H1240
- inhibition of lumbar sympathetic nerve activity, vasopressin and, H1963
- modification of sympathetic vasomotor activity by, GABA and, H1885
- regulation of blood pressure and heart rate during exercise, H2132

Betamethasone

- antenatal therapy with, and preterm coronary arterial vasoreactivity, H538

Blood-brain barrier

- endothelial cells in, receptor-mediated transcytosis of transferrin through, H1149
- in rats, after myocardial infarction, H312

Blood flow*see also Hemodynamics; Shear stress*

- brain stem, during hemorrhagic hypotension, H1350
- cerebral, *see Cerebral blood flow*
- chronic increases in, upregulation of endothelin receptors in arterial smooth muscle by, H65
- collateral, and coronary hemodynamics during brief coronary occlusions, in horses, H1893
- coronary
 - in nitric oxide-inhibited dogs, adenosine in regulation of, H423
 - in sleep, in swine, H723
- microvascular, in rat skeletal muscle, H1696
- myocardial
 - after coronary artery occlusion, species differences in, H1312
 - changes at birth, in lambs, H741
 - and infarct size, in conscious baboons, pigs, and dogs, H1812
 - microheterogeneity of, in normoxic and hypoxic states, H435
- skeletal muscle, insulin and, H2120
- skin, during exercise, effects of cooling on, H208

Blood pressure*see also Hemodynamics; Hypertension; Hypotension; Shock*

- locally altered, arterial remodeling in response to, indicial functions of, H1323
- pulse wave, and derived respiration, H1672
- regulation during exercise, baroreceptor reflexes in, H2132
- response to gravitational changes during exercise, H2132
- variability, autonomic control of, in rats, H2143

Blood volume

- changes, effects on arterial impedance in chick embryo, H1597
- expansion, during maturation in lambs, H1718

Bradycardia

- in aging rat heart, H897

Bradykinin

- in hemodynamic effects of ACE inhibition in heart failure, H1985
- and nitric oxide release in rat skeletal muscle capillaries, H1696
- plasma levels, changes evoked by food intake or insulin administration, H1071

Brain*see also Cerebral blood flow*

- atrial natriuretic peptide, changes after myocardial infarction, in rat, H312
- injury, and vasopressin-induced vasodilation in pial artery, H1272
- iron transport to, H1149
- physiological activation, regional cerebral blood flow response to, in hypoglycemia, H554

- pial arterioles
 dilation, calcitonin gene-related peptide receptors and, H317
 shear and flow rates in, during somatosensory stimulation, H1712
- pial artery vasodilation
 ATP-sensitive potassium channels in, H423
 nitric oxide and opioids in, relationship between, H869
 vasopressin-induced, effect of brain injury on, H1272
- rat
 capillary perfusion heterogeneity, during hypocapnia, H1441
 microvascular endothelial cells, ATP-activated cation channels in, physiological properties of, H1423
 parabrachial nucleus, glutamatergic input to, H1557
 sympathoexcitatory and pressor responses to sodium and ouabain, cerebral angiotensin II and, H275
 vertebralbasilar system, autoregulation in, H1350
- Brain stem**
 blood flow, during hemorrhagic hypotension, H1350

C

Calcitonin gene-related peptide receptors

- in dilation of rat pial arterioles, H317

Calcium ATPase

- in regulation of intracellular calcium, in vascular endothelial cells, H2038
 sarcoplasmic reticulum
 expression, effect of thyroid hormone on, H638
 in hypertrophied hearts, H2021
 in rapid cooling contracture in skinned myocardium, H1662

Calcium channels

- activity in vascular smooth muscle, effects of plasma from ischemic hindlimb of rat, H1485
- L-type
 calcium transients in embryonic chick heart and, H518
 cardiac, phorbol ester effects on, H620
 in cardiomyocytes, H1178
 $\alpha_2\delta$ -subunit, effect on ionic and gating current in HEK 293 cells, H1521
 sarcolemmal, in rat ventricular myocytes, effects of magnesium on, H907
 T-type, calcium transients in embryonic chick heart and, H518

Calcium intake

- and endothelial function, H1250

Calcium ions

- availability, and negative inotropic effect of cocaine on ventricular myocytes, H678
 basal plasma membrane flux in vascular smooth muscle cells, H1972
 binding, and cross-bridge kinetics, cardiac contractile efficiency and, H338, H1101, H1501
 cytoplasmic free, in intact endothelium, induction of, H837
 cytosolic
 in porcine coronary artery, effects of adenosine analogues on, H134

- in vascular smooth muscle cells, H1972
 effects on mitochondrial respiration in rat heart, H1398
 influx into coronary endothelium, regulation by tyrosine kinase, H267
- intracellular
 in diabetic cardiac cells, H1529
 mobilization in stretch-induced increase of sinoatrial node pacemaker activity, H1726
 in resistance arteries, vitamin D and, H230
 stress-strain interrelations with, studied in intact ferret heart, H1940
 overload in cardiomyocytes during metabolic inhibition, extracellular pH and, H2149
 release from sarcoplasmic reticulum, in porcine coronary artery smooth muscle, cyclic ADP-ribose and, H801
 sensitivity, and myocardial contractility, H1905
 transport
 and cardiomyocyte relaxation change with temperature, H1772
 in vascular smooth muscle cells, H1972
 waves, in cardiomyocytes
 effects of ATP-sensitive potassium channel opener on, H1384
 effects of magnesium on, in rat ventricle, H907
- Calcium transients**
 in embryonic chick heart, H518
 in neonatal and adult cardiomyocytes, modulation by angiotensin II and endothelin-1, H857
 in rat ventricular myocytes, effects of magnesium on, H907

Calponin

- effects on force generation by single smooth muscle cells, H1858

Capillaries

- see also **Microvasculature**

- lymphatic
 flow velocity in, H358
 microscopic flow velocity in, H330
 transport in, macroscopic measurement of, H324
 rat skeletal muscle, nitric oxide release in, H1696

Capillary filtration

- enhancement, induced by platelet-activating factor, mechanisms, H127

Cardiac cycle

- analysis, thermodynamic, H730
 in elasmobranchs, H1766

Cardiac hypertrophy

- comparative cardioprotective effects of cromakalim and diltiazem in, H174
 contractile function and regulatory cardiac proteins in, relation between, H2021
 fibroblast changes associated with, angiotensin II and, H2100
 renin-angiotensin system in, H2177

Cardiac output

- see also **Hemodynamics**
 in early pregnancy, in rats, H1779
 in sleep, in swine, H723

Cardiomyocytes

- calcium-loaded depolarized, response to critically timed premature stimulations, H447
 calcium waves in, H907, H1384
 chick embryo, SERCA 2 expression in, effect of thyroid hormone on, H638
 contracting, spatial characterization of, H769
 cultured human atrial, ion channels in, H1676
 death during energy depletion, effect of external pH on, H2149
 function in transgenic mice with annexin VI overexpression in heart, H1091
 glutamate transport and metabolism, during oxygenation, anoxia, and reoxygenation, H1825
- isolated
 anisomotic stress in, H1414
 contraction, angiotensin II and, H2060
 neonatal and adult, calcium transients in, modulation by angiotensin II and endothelin-1, H857
 nitric oxide production, regulation, H1864
 relaxation, effects of temperature and calcium transport mechanisms on, H1772
 reperfusion injury in, after simulated ischemia, H1334
 response to vasoactive peptides, and cardiac development, H857
 single, monocarboxylate transport into, H476
 thin filament activation in, myosin-induced, pH and, H1008
 TNF- α -induced expression of HSP 72 in, in cats, H1231
- ventricular
 calcium waves and calcium transients, effects of magnesium on, in rat heart, H907
 characterization of stimulatory adenosine A_{2A} receptor in, H1655
 contractility, CGP-48506 and, H24
 delayed rectifier potassium currents, in fetal mouse, H2088
 negative inotropic effect of cocaine on, H678
 neurokinin-induced atrial natriuretic peptide release, in neonatal rat, H935
 protein phosphatase inhibitor-1 in, H1159
 from streptozocin diabetic rats, altered calcium handling in, H1529
- Cardioprotection**
 see also **Ischemic preconditioning**
 by anti-CD18 antibodies, factors affecting, in dogs, H53
 by cromakalim, in ischemic hypertrophied rat hearts, H174
 by diltiazem, in ischemic hypertrophied rat hearts, H174
 ecto-5'-nucleotidase activity in, H238, H1493, H1744
 by endogenous adenosine, H1493
 hyperthermia-mediated, in rabbits, H1165
 mediated by ATP-sensitive potassium channels, activation of 5'-nucleotidase in, H1744

Cardioprotection (*continued*)

- in myocardial ischemia/reperfusion
 - acidic reperfusion in, H957
 - in baboons, pigs, and dogs, H1812
 - glutamate in, H1825
 - metabolic interventions for, H1607
- nonanticoagulant heparin in, after hemorrhagic shock, H1294
- by recombinant serpin LEX-032, H881
- by sodium/hydrogen exchanger inhibitors, extracellular buffer composition and, H692

Cardiovascular reflexes

- afferent input summation in, H849

Cardiovascular system

- development in chick embryo, H1597
- function
 - after hemorrhagic shock, beneficial effects of nonanticoagulant heparin on, H1294
 - short-term control of, H651
- neonatal, response to blood volume expansion, during maturation in lambs, H1718

Carotid artery, baroreceptor reflexes

- arterial compliance and, H988
- in hemodynamic responses to acute central hypovolemia, H1538
- in regulation of blood pressure and heart rate during exercise, H2132

Catalase

- intracellular activity, and hyperthermia-mediated cardioprotection, H1165

Catecholamines

- and ischemic preconditioning in rabbit heart, H1078
- plasma levels, increase at birth, in lambs, H668

Cation channels

- ATP-activated, physiological properties in rat brain microvascular endothelial cells, H1423

Cell adhesion molecules

- smoking-induced, and transendothelial migration of monocytes, H1624

Cerebral arteries, contraction

- cold-stimulated, mechanism of, in newborn lamb, H645
- norepinephrine-induced, α_1 -adrenoceptor-inositol phosphate coupling in, H915

Cerebral blood flow

- see also Cerebral arteries; Cerebral circulation*
- in anemia, H466
- during hemorrhagic hypotension, H1350
- during hypocapnia, in rats, H1441
- hypoxic, regulation in rat, potassium in, H45
- regional
 - response to brain activation, in hypoglycemia, H554
 - response to vibrissal stimulation in type I nitric oxide synthase knockout mice, H1085
- regulation, H915
- during somatosensory stimulation, H1712

Cerebral circulation, vasodilation in

- cGMP-mediated, ATP-sensitive potassium channels in, H423
- vasopressin-induced, effect of brain injury on, H1272

Cerebral ischemia

- and *N*-methyl-D-aspartate responses, H1225

Cerebral microcirculation

- disturbance during hypocapnia, in rats, H1441
- endothelium-dependent dilation, laser-dye impairment of, singlet oxygen and, H1258
- responses to *N*-methyl-D-aspartate, in piglets, effects of ischemia on, H1225

c-fos gene

- activation in adult rat hearts, renin-angiotensin system in, H2177

CGP-48506

- cardiotonic mechanism of, H24

Chloride channels

- calcium-activated, in pulmonary arterial myocytes, H1577
- in stretch-induced increase of sinoatrial node pacemaker activity, H1726

Cholesterol

- plasma levels, exercise training and, H2008

Choroid

- oxygen levels in, in guinea pig, H965

Cocaine

- negative inotropic effect on ventricular myocardium, in ferret, H678

Cold stimulus

- see also Hypothermia*
- cerebral arterial contraction in response to, mechanism of, in newborn lamb, H645

Collagen

- exercise- and hypertension-induced changes in, and cardiac function, in rats, H151

Collateral blood flow

- and coronary hemodynamics during brief coronary occlusions, in horses, H1893

Complement

- activation, and endothelial dysfunction in rabbits, H1924

Congestive heart failure, *see* Heart failure**Coronary arteries**

- cytosolic calcium, effects of adenosine analogues on, H134
- effects of lung allograft rejection on, H2191
- epicardial, of pressure-overloaded heart, protein synthesis in, H685
- nitric oxide-mediated relaxation, and antenatal betamethasone therapy, H538
- occlusion, myocardial stunning after, species differences in, H1312
- oxygen-elicited responses in, in calf, H1044
- relaxation by cyclopiazonic acid, in pigs, H2038
- resistance, and myocardial stretch, H924
- smooth muscle, sarcoplasmic reticulum calcium release, cyclic ADP-ribose and, H801
- tension, effects of adenosine analogues on, H134
- thrombosis, canine model of, xanthine oxidase-mediated cyclic flow variations in, H1993

Coronary blood flow

- see also Coronary circulation*
- in nitric oxide-inhibited dogs, adenosine in regulation of, H423
- in sleep, in swine, H723

Coronary circulation

- see also Coronary arteries; Coronary blood flow*

- adenosine kinetics in, in dog, H1469
- factors affecting, in situ canine hearts, H1568
- regulation, adenosine in, in nitric oxide-inhibited dogs, H423
- vasodilation

- β_1 -adrenoceptor-induced, pinacidil and, in dogs, H2210
- metabolic, in dogs, H2210

Coronary microcirculation

- endothelium-dependent vasodilation, platelet-activating factor and, H2094

- flow-induced vasodilation in, H1878

Coronary vascular resistance

- in sleep, in swine, H723

Countercurrent gas exchange

- and CO₂ back-diffusion, effects on tissue oxygenation, H1453

Crabtree effect, H1869**Cromakalim**

- cardioprotection by, in ischemic hypertrophied rat hearts, H174
- and functional hyperemia in striated muscle, H1649
- and infarct size-limiting effect of ischemic preconditioning, H1744

Cyclic ADP-ribose

- stimulation of sarcoplasmic reticulum calcium release in porcine coronary artery smooth muscle, H801

Cyclic nucleotides

- functional antagonism between, and endothelial barrier function, H1264

Cyclopiazonic acid

- effects on intracellular calcium in vascular endothelial cells, H837, H2038

Cytochrome oxidase

- subunit VIa isoforms, developmental regulation of, H567

Cytochrome P-450

- inhibition, attenuation of hypoxemia of acute lung injury, in dogs, H1355

Cytokines

- heat shock protein 72 expression induced by, in feline cardiomyocytes, H1231
- release in hypertensive rats, H2125

D**Diabetes mellitus**

- microangiopathy in, pathogenesis, H2014
- rat streptozocin model of, altered calcium handling in ventricular myocytes from, H1529

Diet

- high-calcium, reversal of hypertension and endothelial dysfunction, in deoxycorticosterone-NaCl-treated rats, H1250

Diltiazem

- cardioprotection by, in ischemic hypertrophied rat hearts, H174

Dimethylamiloride

cardioprotective efficacy, extracellular buffer composition and, H692

Dobutamine

effect on ventriculoarterial coupling, in regional myocardial ischemia in dogs, H1279

Doppler ultrasound

cardiac, in aging and hyperthyroid mice, H2204

E**Edema, pulmonary, see Pulmonary edema****Egr-1 (early growth response) gene**
expression in cardiac fibroblasts, H2100**Elasmobranchs**

venous return and ventricular filling in, H1766

Electrophysiology

see also **Ion channels**

of calcium loading and premature stimulations of cardiomyocytes, H447

in canine atrium, H2157

of cultured human atrial myocytes, H1676

of ionic and gating current in HEK 293 cells, H1521

of lymphatic smooth muscle of guinea pig mesentery, H1687

of microvascular endothelial cells, in rat brain, H1423

studied in vivo, novel guinea pig heart model for, H1850

of transient atrioventricular nodal responses, H2070

vagal cardiac, psychosocial influences upon, H1381

Enalaprilat

hemodynamic effects in heart failure, bradykinin pathway in, H1985

Endocardium

biaxial mechanical properties of, H2169

Endocrine system

neonatal, response to blood volume expansion, during maturation in lambs, H1718

Endothelial cells

see also **Leukocytes; Neutrophils**

blood-brain barrier, receptor-mediated transcytosis of transferrin through, H1149

capillary, adenosine uptake by, in blood-perfused canine heart, H1469

ET-1 secretion, inhibition by prostaglandins, H1342

expression and release of adhesion molecules, H807

leukocyte adhesion to, and leukocyte rolling velocity, H1371

microvascular, ATP-activated cation channels in, in rat brain, H1423

monocyte chemotactic protein-1 secretion, mechanical strain and, H1462

monocyte migration across, in smokers, H1624

monolayer cultures, permeability, and functional antagonism between cAMP and cGMP, H1264

vascular

intracellular calcium, regulation, H2038

reoxygenation injury, superoxide anion in, H945

Endothelin-B receptors

in arterial smooth muscle, upregulation by chronic increases in blood flow, H65

Endothelins

effects on *Egr*-1 and matrix gene expression in cardiac fibroblasts, H2100

ET-1

effect on fetal oxygen consumption in sheep, H16

in hemodynamic response to posture, H1200

inhibition by endogenous atrial natriuretic peptide, H1819

modulation of calcium transients in cardiomyocytes, H857

portal venous contractile response to, endotoxin pretreatment and, H7

in regulation of renal function in humans, H1200

secretion from endothelial cells, inhibition by prostaglandins, H1342

Endothelium

activation in hypertensive rats, H2125

aortic

injury in vivo, H1841

integrity, technical and statistical approach to study of, H1841

arachidonic acid metabolite produced by, vasorelaxant effect, H1021

arteriolar

depolarization, ratiometric measurement of, with potential-sensitive dye, H2216

function, platelet-activating factor and, H2094

barrier function, functional antagonism between cAMP and cGMP and, H1264

coronary

calcium influx into, regulation by tyrosine kinase, H267

microvascular, function, platelet-activating factor and, H2094

dysfunction

after myocardial ischemia/reperfusion, H1634, H2094

complement-induced, in rabbits, H1924

platelet-activating factor and, H2094

reversal, by high-calcium diet, in deoxycorticosterone-NaCl-treated rats, H1250

in insulin-induced dilation of skeletal muscle arterioles, H2120

leukocyte rolling velocity along, measurement, H1371

nitric oxide production and release, see **Nitric oxide, endothelial release of**

oxidative stress to, endogenous cytoprotection against, H107

pulmonary, water channels across, aquaporin-1 and, H416

reactivity, hyperglycemia and, H2014

response to long-term exposure to oxygen-derived free radicals, H2184

vascular

calcium influx in, H837

effects of lung allograft rejection on, H2191

Endothelium-derived relaxing factor, see Nitric oxide**Endotoxin**

see also **Shock, septic**

left ventricular contractility decrease caused by, nitric oxide and, H1979

left ventricular systolic depression caused by, H485

pretreatment with, and portal venous contractile response to endothelin-1, H7

Energy

free, and contractile reserve in isolated rat heart, H1207

metabolism, in vascular smooth muscle, H1869

Enkephalins, see Opioids**Epicardium**

biaxial mechanical properties of, H2169

Epidermal growth factor

effects on *Egr*-1 and matrix gene expression in cardiac fibroblasts, H2100

Epinephrine

plasma levels, clearance, and spillover in lambs, H668

Epoxyeicosatrienoic acid

and lung injury, H1355

Erythrocytes

aggregability, enhanced, in β -thalassemia major, H1951

mass, in humans, and prolonged exercise training, H121

Excitation-contraction coupling, in cardiac tissue

effects of cellular inhomogeneities on, H1101

intracellular mechanisms and, H338

studied in intact ferret heart, H1940

Exercise

α -adrenoceptor activation during, reversal of pulmonary vasoconstriction induced by, H875

collagen changes induced by, and cardiac function, in rats, H151

gravitational changes during, blood pressure and heart rate responses to, H2132

skin blood flow during, effects of cooling on, H208

Exercise training

prolonged, hematological response to, in humans, H121

vascular reactivity and, H2008

F**Fasting**

effects on ischemia tolerance in rat heart, H1607

Fatty acid oxidation

effects of propionate on, H2197

in vascular smooth muscle, H1869

Females, see Gender differences**Fetoplacental microcirculation**

effect of endothelin-1 on, in sheep, H16

Fetus

see also **Newborn**

heart

see also **Heart, development**

sympathetic innervation and vascularity of, H33

vasculogenesis/angiogenesis in, H33

Fetus (continued)

- mouse, ventricular myocytes, delayed rectifier potassium currents, H2088
- oxygen consumption, effect of endothelin-1 on, in sheep, H16
- ventricular function, myocardial blood flow, and oxygen consumption in, H741

Fibroblast growth factor

- basic, mitogenic response to, in vascular smooth muscle, H1141

Fibroblast growth factor receptors

- FGFR-1, in vascular smooth muscle, modulation by IGF-I, H1141

Fibroblasts

- cardiac, effects of angiotensin II on, comparison with effects of other growth factors, H2100

Fish

- elasmobranch, venous return and ventricular filling in, H1766

Fluorescence imaging microscopy

- of energy-depleted cardiomyocytes, H2149
- of oxygen diffusivity in microvascular beds, H1390
- of vascular endothelium, H2216

Fluorescence microlymphography

- transport and flow measurements with, H324, H330, H358

Food intake

- effects on kininogen in human plasma, H1071

Free radicals, see Reactive oxygen species**G****Gender differences**

- in complement-induced endothelial dysfunction, H1924

Gene expression

- Egr*-1 (early growth response), in cardiac fibroblasts, H2100
- glyceraldehyde-3-phosphate dehydrogenase, oxidative stress and, in rabbit aorta, H81

Ginglymostoma cirratum, see Nurse shark**Glibenclamide**

- and functional hyperemia in striated muscle, H1649
- and hypoxic cerebral blood flow, H45
- and infarct size-limiting effect of ischemic preconditioning, H1744
- and rate of coronary flow regulation, H492

Glucocorticoids

- antenatal therapy with, and preterm coronary arterial vasoreactivity, H538

Glucose

- metabolism
 - in low-flow ischemia, H817
 - in rat heart, H224
- oxidation, in ischemia/reperfusion of rat heart, H72

Glutamate

- transport and metabolism in cardiomyocytes, during oxygenation, anoxia, and reoxygenation, H1825

Glutamate receptors

- subtypes, input to parabrachial nucleus, H1557

Glyceraldehyde-3-phosphate dehydrogenase

- expression in rabbit aorta, oxidative stress and, H81

Glycolysis

- in ischemia/reperfusion of rat heart, H72
- during low-flow ischemia, in isolated working rat heart, H817
- in vascular smooth muscle, H1869

Glycoproteins

- GP1Ib-IIIa complex, platelet surface, effects of nitric oxide on, H1640

Golden hamster

- cremaster muscle stimulation, vasodilatory response to, ATP-sensitive potassium channels in, H1649
- hemorrhagic shock in, systemic and microvascular PO_2 dissociation during, H827

G proteins

- in activation of phospholipase D in vascular smooth muscle, H1031

Gregg effect

- dynamic, H492
- steady-state, H492

Growth factor, see Epidermal growth factor; Fibroblast growth factor; Insulin-like growth factors; Vascular endothelial growth factor**Guanosine 3',5'-cyclic monophosphate**

- and effects of nitric oxide on platelet surface glycoproteins, H1640
- and inhibition of endothelin-1 by endogenous atrial natriuretic peptide, H1819
- vascular smooth muscle, and angiotensin II-induced vasoconstriction, H1914

Guanosine triphosphate cyclohydrolase

- and cytokine-induced nitric oxide production by cardiomyocytes, H1864

Guanylate cyclase

- prostaglandins and, in inhibition of ET-1 secretion from endothelial cells, H1342
- in vascular smooth muscle cells, and nitric oxide-mediated relaxation in coronary arteries, H538

H**Halothane**

- and rapid cooling contracture in skinned myocardium, H1662

Hamster

- Syrian (golden), *see* Golden hamster

Heart

- see also* Cardiac hypertrophy; Ischemia; Ischemia/reperfusion; Myocardium

- autonomic tone, assessment of, H2081
- contractile efficiency, constancy and variability, mechanisms, H1501
- contractility, suppression by mechanical vibration, H583
- development
 - and cardiomyocyte response to vasoactive peptides, H857
 - changes in ATP use during graded hypoxia in, *in vivo*, H216

- cytochrome oxidase subunit VIa isoforms in, H567
- sympathetic innervation and, H33
- Doppler studies, in aging and hyperthyroid mice, H2204
- embryonic chick
 - blood volume changes and arterial impedance in, H1597
 - calcium transients in, H518
 - SERCA 2 expression in, effect of thyroid hormone on, H638
- ferret, length-dependent activation in, H1940

fetal

- see also* Heart, development
- sympathetic innervation and vascularity of, H33
- vasculogenesis/angiogenesis in, H33
- function
 - in elasmobranchs, H1766
- exercise- and hypertension-induced changes in cardiac collagen and, H151
- perinatal, in lambs, H741
- guinea pig, as model for studying atrioventricular nodal conduction and triggered activity in *vivo*, H1850
- mechanics, H1015, H1279, H2169
- mathematical modeling of, H281
- studied in intact ferret heart, H1940
- mitochondrial metabolism
 - substrate specificity of, H1398
 - tricarboxylic acid cycle activity, after myocardial ischemia, H72
- neonatal, ATP use during graded hypoxia and reoxygenation, *in vivo*, H216
- 5'-nucleotidase in, soluble forms of, H1493

rat

- reduced contractile reserve, energetic basis for, H1207
- soluble forms of 5'-nucleotidase in, H1493
- vibration, mechanoenergetics of, H583
- whole, length-dependent activation in, H1940

Heart failure

- canine model of
 - effects of ACE inhibition and β -blockade on skeletal muscle fiber types in, H115
 - inhibition of endothelin-1 by endogenous atrial natriuretic peptide in, H1819
- experimental models of, natriuretic peptide responses to, H594
- hemodynamic effects of ACE inhibitors in, bradykinin pathway in, H1985
- moderate, canine model of, effects of ACE inhibition and β -blockade on skeletal muscle fiber types in, H115
- pathophysiology, H1819

Heart rate

- see also* Arrhythmias
- age-related changes in, in rat heart, H897
- history, effects on transient atrioventricular nodal responses, H2070
- lung volume and, age and autonomic effects on relationships between, H1825
- response to gravitational changes during exercise, H2132
- variability

- autonomic stimulation and, H2081
power spectral analysis in investigation of, H1672
vagal mediated, in rats, H2143
- Heart ventricles**
see also Arrhythmias; Cardiomyocytes; Heart rate
contractility, decreased, in sepsis, H1446
diastolic suction, H1015
with zero left atrial pressure in open-chest dogs, H1217
fetal mouse, delayed rectifier potassium current in, H2088
function, changes at birth, in lambs, H741
- left
contractility, intracellular feedback control loops, H338
contractility during endotoxemia, effects of nitric oxide synthase inhibition on, H1979
diastolic suction, with zero left atrial pressure in open-chest dogs, H1217
endotoxin-induced systolic depression, H485
ischemic, regional wall mechanics in, H398
mass, arterial elasticity and, H981
mechanics, H1279, H1940
regionally stunned, myocardial relaxation in, H509
residual strain in, myocardial swelling and, H1736
restoring forces, assessed with left atrial pressure clamps, H1015
volumetric conductance catheter, for rats, H1509
work efficiency of, H1279
mechanics, H1015, H1279
studied in intact ferret heart, H1940
wall vibration, negative inotropism of, mechanoenergetics of, H583
- Heat shock proteins**
expression during sequential ischemia/reperfusion, and contralateral skeletal muscle salvage, H1407
HSP 72, TNF- α -induced expression, in feline cardiomyocytes, H1231
and hyperthermia-mediated cardioprotection, H1165
- Hematocrit**
in isolated rat lung, effects on pulmonary vascular responsiveness to nitric oxide synthase inhibitors, H1757
- Heme oxygenase**
nitric oxide-mediated activation, H107
- Hemodynamics**
coronary, during brief coronary occlusions at three levels of collateral function, in horses, H1893
disordered, in β -thalassemia major, enhanced red blood cell aggregability and, H1951
in early pregnancy, in rats, H1779
embryonic vascular, effects of blood volume on, H1597
hemorrhage-induced alterations, role of nitric oxide in, H1616
of heterogeneous microvascular networks, H545
pulmonary, at varied pH, endothelial modulation of, H252

- Ileal artery**
remodeling, in response to locally altered blood pressure, indicial functions of, H1323
- Image analysis**
computer-assisted video-based, for spatial characterization of contracting cardiomyocytes, H769
of red blood cell aggregability, in β -thalassemia major, H1951
- Infarction-reperfusion**, *see* Ischemia/reperfusion
- Inflammation**
CD18 in, and leukocyte infiltration, H183
E-selectin upregulation in vivo and, H183
nitrogen dioxide and peroxynitrite in, H1038
- Inosine**
vasoconstriction caused by, secondary mediators in, H560
- Inositol phosphates**
and α_1 -adrenergic receptor density in cerebral arteries, H915
- Insulin**
administration, effects on kininogen in human plasma, H1071
dilation of isolated skeletal muscle arterioles, H2120

Insulin (*continued*)

- effects on ischemia tolerance in rat heart, H1607
- stimulation of sodium pump activity, in rabbit aorta, H1278

Insulin-like growth factors

- IGF-I, modulation of FGFR-1 in rabbit vascular smooth muscle cells, H1141

Interleukins

- IL-1, and nitric oxide production by cardiomyocytes, H1864
- IL-1 β , release in hypertensive rats, H2125

Intracellular adhesion molecules

- ICAM-1
 - expression in endothelial cells, H807
 - expression in hypertensive rats, H2125

Ion channels

- in cultured human atrial myocytes, H1676
- effect on ionic and gating current in HEK 293 cells, H1521
- in fetal mouse heart, H2088
- in sinoatrial node pacemaker cells, H2108
- stretch-activated, in endothelial cells, H1462

Iron

- transport to brain, H1149

Ischemia

- cerebral, and *N*-methyl-D-aspartate responses, H1225
- global, effects on cerebrovascular responses to *N*-methyl-D-aspartate, in piglets, H1225
- myocardial, *see* **Myocardial ischemia**
- simulated, in cardiomyocytes, reperfusion injury after, H1334
- skeletal muscle, humoral mediation of CD18 activity after, H1515

Ischemia/reperfusion

- see also* **Hyperemia; Myocardial ischemia; Oxygenation**
- cardioprotective efficacy of sodium/hydrogen exchanger inhibitors in, extracellular buffer composition and, H692

- endothelial dysfunction in, H2094
- injury

- in cardiomyocytes, after simulated ischemia, H1334
- hyperthermia-mediated protection against, in rabbit myocardium, H1165
- limitation in myocardium, in baboons, pigs, and dogs, H1812
- mechanisms of, H1515
- in isolated working rat heart, glucose metabolism in, H817

- myocardial
 - acidic reperfusion in, H957
 - effects of propionate during recovery from, H2197
 - endothelial dysfunction after, H1634, H2094
 - norepinephrine kinetics during, H245
 - protective effect of anti-CD18 antibodies in, factors affecting, H53
 - P-selectin in, in dogs, H88
 - serpins and, H881
 - tricarboxylic acid cycle activity after, H72

- sequential, contralateral skeletal muscle salvage and, H1407
- tolerance, in rat heart, H1607

Ischemic preconditioning

- cardioprotection by, ecto-5'-nucleotidase activity in, H238
- catecholamines and, in rabbit heart, H1078
- comparative effects of, in baboons, pigs, and dogs, H1812
- cytoprotective effect, contralateral skeletal muscle salvage and, H1407
- lactate accumulation and, H38
- mediated by ATP-sensitive potassium channels, activation of 5'-nucleotidase in, H1744
- in rat heart, H1607

Isoflurane

- and rapid cooling contracture in skinned myocardium, H1662

Isoproterenol

- effects on protein phosphatase inhibitor-1 in ventricular cardiomyocytes, H1159

K**Kidney**

- see also* **Renal sympathetic nerve activity**

- neonatal, response to blood volume expansion, during maturation in lambs, H1718
- response to postural change, ET-1 in, H1200
- vasoconstriction in, muscle chemoreflex and, H951

Kidney cells

- human embryonic kidney (HEK 293), ionic and gating current in, H1521

Kininogen

- plasma levels, changes evoked by food intake or insulin administration, H1071

Knockout studies, in mice

- type I nitric oxide synthase, regional cerebral blood flow response to vibrissal stimulation in, H1085

L**Lactate**

- accumulation, and lethal ischemic injury, H38
- effects on ischemia tolerance in rat heart, H1607
- metabolic compartmentation of, in glucose-perfused rat heart, H224

Laser confocal microscopy

- of cardiac calcium waves and ATP-sensitive potassium channel opener, H1384

Leopard shark

- cardiac cycle in, H1766

Leukocytes

- rolling velocity, relation to leukocyte-endothelium adhesion and cell deformability, H1371

Lung

- see also under* **Pulmonary**
- α -adrenoceptor activation during exercise, reversal of pulmonary vasoconstriction induced by, H875

- allograft, acute rejection of, systemic vascular effects during, H2191
- endothelium, water channels across, aquaporin-1 and, H416
- interstitial pressure, in development of pulmonary edema, H2000
- isolated perfused, pH-dependent pressor response in, endothelial modulation of, in rabbit, H252
- perfusate
 - hematocrit, effects on pulmonary vascular responsiveness to nitric oxide synthase inhibitors, H1757
 - viscosity, effects on pulmonary vascular responsiveness to nitric oxide synthase inhibitors, H1757
- tissue mechanics, and development of pulmonary edema, H2000

Lung injury, acute

- adenosine A₁ and A_{2a} receptors in, H610
- epoxyeicosatrienoic acid and, H1355

Lung volume

- and heart rate, age and autonomic effects on relationships between, H1825

Lusitropism, myocardial

- α ₁-adrenoceptor stimulation in cat papillary muscles and, H701
- new measure for, H2228

Lymphatics

- β -adrenergic hyperpolarization in, H1687
- initial
 - flow velocity in, in humans, H358
 - microscopic flow velocity in, H330
- transport physiology of, H324
- peritoneal, mapping, H1549
- transport of tracer albumin from peritoneum to plasma, H1549

Lysosomal protein

- CD63, platelet surface, effects of nitric oxide on, H1640

M**Magnesium ions**

- antiarrhythmic action of, H907
- effect on calcium waves and calcium transients in rat ventricular myocytes, H907

Magnetic resonance imaging

- calculating 3-D regional ventricular strains from, H281

Males, *see* Gender differences**Mast cells**

- histamine and thromboxane derived from, in inosine-induced vasoconstriction, H560

Mathematical models

- of baroreflex control of arterial pressure, H651
- of calcium binding and cross-bridge kinetics, H338, H1101
- for calculating 3-D regional ventricular strains from MRI tissue tagging, H281
- for coupling of heart and arterial system, H2050
- of shear stress and vascular growth, H364

Membrane potential

- optical recordings of, H2216

Mesenteric circulation

- arteries

- myogenic tone in, in spontaneously hypertensive rats, H1
remodeling in response to locally altered blood pressure, indicial functions of, H1323
microvascular beds, oxygen diffusivity in, in rat, H1390
stress-induced vasoconstriction in, neuropeptide Y Y₁ receptors in, in rats, H796
- Metabotropic receptors**
presynaptic, glutamate and, H1557
- Methodologies**
for applying cyclic strains on perfused vessel, H787
for assessing aortic distensibility and compliance in rats, H780
for assessing cardiac pump function, H1509
for assessing left ventricular restoring forces, with left atrial pressure clamps, H1015
for characterizing baroreflex gain using autoregressive moving average analysis, H1240
for deriving respiration from blood pressure pulse wave, H1672
for direct measurement of transverse residual strains in aorta, H750
for double-exponential curve-fitting of isometric relaxation, H2228
for ex vivo investigation of biochemical pathways in intact vascular tissue, H760
for fluorescence microlymphography, H324, H330
for fluorescence photobleaching, H330
for macroscopic measurement of lymphatic capillary transport, H324
for magnetic resonance imaging tissue tagging, H281
for measurement of leukocyte rolling velocity along endothelium, H1371
for measuring unloaded myocardial oxygen consumption, H1063
for microscopic fluorometry of oxygen, H1390
for microspectroscopy in exocrine pancreas, H1704
for optical recordings of membrane potential, H2216
for ratiometric measurement of endothelial depolarization in arterioles, H2216
for studying arterial elasticity and left ventricular mass, H981
for transfer function analysis of aortic baroreceptor reflex in rabbits, H1054
- N-Methyl-D-aspartate**
cerebrovascular responses to, effects of ischemia on, in piglets, H1225
- N-Methyl-D-aspartate receptors**
spinal, blockade, reflex pressor response and, H500
- α , β -Methyleneadenosine 5'-diphosphate**

 - in ischemia/reperfusion of rat heart, H72
 - mechanical determinants of, in conscious dogs, H2229

Oxygen consumption (*continued*)

- and pressure-volume area, relation between, derived from thermodynamics, H730
- transients, after perfusion pressure changes, in goats, H492
- unloaded, measurement, H1063
- and ventricular wall vibration, H583
- in rat mesentery, measurement, H1390
- in vascular smooth muscle, H1869

Oxygen-derived free radicals

see also **Reactive oxygen species**; **Superoxide anion**

- effects on pulmonary arteries, with long-term exposure, H2184
- in enhanced capillary fluid filtration induced by PAF, H127
- in vascular endothelial cell reoxygenation injury, H945

Oxygen tension

- arterial, and control of coronary vascular tone, H435

P**Palmitate**

- metabolism, effects of propionate on, H2197

Pancreas

- exocrine, microvessels, oxygen transport in, H1704

Papillary muscles

- α_1 -adrenoceptor stimulation in, negative lusitropic effect of, H701

Perfused vessels

- device to apply cyclic strains on, H787

Perfusion system

- pulsatile, for *ex vivo* investigation of biochemical pathways in intact vascular tissue, H760

Peripheral vascular resistance

- in sleep, in swine, H723

Peritoneal dialysis

- transport of tracer albumin from peritoneum to plasma during, H1549

Peroxyinitrite

- in inflammation, H1038

pH

- effects on pulmonary circulation, endothelial modulation of, H252
- extracellular, effect on cardiomyocyte death during energy depletion, H2149
- and myosin-induced thin filament activation in cardiac and skeletal muscle, H1008

Phorbol esters

- inhibition of cardiac L-type calcium channels, H620

Phosphates

- cytoplasmic, and sodium-potassium balance in rat heart, H1302

Phospholamban

- in hypertrophied hearts, H2021

Phospholipase D

- activation by G protein in vascular smooth muscle, H1031

Physical training, see **Exercise training****Pial vasculature**, see **Brain****Pinacidil**

- and β_1 -adrenoceptor-induced coronary vasodilation in dogs, H2210

Platelet-activating factor

- effects on endothelium-dependent coronary arteriolar vasodilation, H2094
- enhanced capillary filtration induced by, mechanisms, H127

Platelet endothelial cell adhesion molecule-1

- phosphorylation, and transendothelial migration of monocytes, H1624

Platelet 53-kDa activation antigen (CD63), see **Lysosomal protein, CD63****Platelets**

- adherent, flow-induced detachment from fibrinogen-coated surface, H160
- aggregation
 - in canine coronary arterial thrombosis, xanthine oxidase and, H1993
 - persistence of ADP secretion and, H1131
- dense-granule centralization and persistence of ADP secretion, H1131
- surface glycoproteins, effects of nitric oxide on, H1640

Polymorphonuclear cells, see **Neutrophils****Portal vein**

- contractile response to endothelin-1, endotoxin pretreatment and, H7

Postischemic reperfusion, see **Ischemia/reperfusion****Potassium channels**

see also **Potassium currents**
ATP-sensitive

- β -adrenergic receptors and, in canine coronary circulation, H2210
- cardioprotection mediated by, activation of 5'-nucleotidase in, H1744
- in cGMP-mediated pial artery vasodilation, H423
- in CGRP receptor-coupled cAMP production for dilation of pial arterioles, H317
- of coronary smooth muscle cells, effects of arachidonic acid on, H1957
- and functional hyperemia in striated muscle, H1649
- openers, effects on calcium waves in cardiomyocytes, H1384
- openers, in ischemic hypertrophied rat hearts, H174
- atrial muscarinic, regulation by cytosolic protein, H526
- calcium-activated, in CGRP receptor-coupled cAMP production for dilation of pial arterioles, H317
- in cultured human atrial myocytes, H1676

Potassium currents

see also **Potassium channels**

- delayed rectifier
 - in canine atrium, H2157
 - in fetal mouse ventricular myocytes, H2088
- rapidly activating component of, H2088
- transient outward
 - in canine atrium, H2157
 - pulse chemistry model of, H386

Potassium ions

- conductance, in lymphatic smooth muscle of guinea pig mesentery, H1687

- homeostasis, cytoplasmic phosphates and, in rat heart, H1302
- in regulation of hypoxic cerebral blood flow, H45

Pregnancy

- hemodynamic changes in, in rats, H1779
- nitric oxide production in, prostacyclin and, H1914

Pressure-flow relationship

pulmonary, H1757

Pressure-volume area

- in acute regional myocardial ischemia in dogs, H1279
- calcium and cross-bridge kinetics and, H1101, H1501
- left ventricular, mechanoenergetic relationships and, H1905
- left ventricular systolic, H1063
- and negative inotropism of ventricular wall vibration, H583
- myocardial oxygen consumption and, relation between, derived from thermodynamics, H730

Pressure-volume relationship, end-systolic

- in acute regional myocardial ischemia in dogs, H1279
- and intracellular control of contraction, H338
- measurement, conductance catheter for rat and, H1509
- in sepsis, H1446

Preterm infant

- coronary arterial relaxation, nitric oxide-mediated, and antenatal betamethasone therapy, H538

Propionate

- effects on acetate and palmitate metabolism, H2197

Prostacyclin

- inhibition of ET-1 secretion from endothelial cells, by stimulation of guanylate cyclase, H1342
- and nitric oxide production in pregnancy, H1914

Prostaglandins

- in neurokinin-stimulated atrial natriuretic peptide release, in neonatal rat ventricular myocytes, H935

PGE₂

- inhibition of ET-1 secretion from endothelial cells, by stimulation of guanylate cyclase, H1342

PGI₂, see **Prostacyclin**

Protein

- synthesis, in epicardial coronary artery of pressure-overloaded heart, H685

Protein kinases

- PKC
 - and contractile competence of vascular smooth muscle, H1363
 - inhibitors, in prevention of endothelial dysfunction after reperfusion, H1634
 - in neurokinin-stimulated atrial natriuretic peptide release, in neonatal rat ventricular myocytes, H935
 - and stimulation of vascular sodium pump activity, H1278
- PKC- ϵ , translocation in adult rat hearts, renin-angiotensin system in, H2177

Protein phosphatase inhibitor-1

- in ventricular cardiomyocytes, H1159

Protein tyrosine kinase

signaling in cold-stimulated contraction of newborn lamb cerebral arteries, H645

Proteoglycans

pulmonary interstitial, in development of pulmonary edema, H2000

Pulmonary artery

effects of long-term exposure to oxygen radicals, H2184
effects of lung allograft rejection on, H2191
relaxation, caused by nitrogen dioxide, H1038
smooth muscle, calcium-activated chloride currents, H1577
vasodilation after chronic hypoxia, H888

Pulmonary circulation

tone-dependent responses in, adenosine A₁ and A_{2a} receptors in, H200
vasoconstriction induced by α -adrenoceptor activation during exercise, reversal of, H875
and nitric oxide inhalation, in cat, H974
vasodilation after chronic hypoxia, H888
and nitric oxide inhalation, in cat, H974

Pulmonary edema

adenosine A₁ and A_{2a} receptors in, H610
development of, interstitial pressure and proteoglycans in, H2000

Pulmonary hypertension

adenosine A₁ and A_{2a} receptors in, H610

Pulmonary vasculature

adenosine A₁ and A_{2a} receptors in, pharmacological probes for, in cat, in vivo, H610
responsiveness to nitric oxide synthase inhibitors, effects of hematocrit and perfusate viscosity on, H1757

R**Rarefaction**

in skeletal muscle, of reduced renal mass hypertensive rat, H661

Reactive oxygen species

see also **Oxygen-derived free radicals; Superoxide anion**
in reperfusion injury after simulated ischemia, in cardiomyocytes, H1334

Renal artery

effects of lung allograft rejection on, H2191

Renal sympathetic nerve activity

response to angiotensin II, H275
response to aortic baroreceptor reflex, in rabbits, H1054
response to graded volume expansion in lambs, during maturation, H1718

Renin-angiotensin system

in cardiac hypertrophy, H2177
cerebral, H275
in *c-fos* gene activation, in adult rat hearts, H2177
in orthostasis-induced changes in renal function, H1200

Reperfusion, see Ischemia/reperfusion

Residence time distribution theory
in macroscopic measurement of lymphatic capillary transport, H324

Resistance arteries

contraction, vitamin D and, H230

Respiration

age-related changes in, relationship to heart rate, H1825
derived from blood pressure pulse wave, H1672

Retina

avascular mammalian, intraretinal oxygen distribution in, H965

Retinoic acid

effect on contractile competence of vascular smooth muscle, H1363

S**Sarcoplasmic reticulum**

calcium ATPase in hypertrophied hearts, H2021
in rapid cooling contracture in skinned myocardium, H1662
SERCA 2 gene, expression, effect of thyroid hormone on, H638
calcium release in porcine coronary artery smooth muscle, cyclic ADP-ribose and, H801
role in modulating cardiac inotropy, H1662
calcium transients in embryonic chick heart and, H518

Sciatic nerve

stimulation, effects on cerebral blood flow, H1712

Secretin

pancreatic secretion stimulated by, effects on oxygen transport parameters in pancreatic microvessels, H1704

Selectins

in enhanced capillary fluid filtration induced by PAF, H127
E-selectin and blood leukocyte infiltration, in inflammation, H183
expression on endothelial cells, H807
and polymorphonuclear cell infiltration, in inflammation, H183
P-selectin in ischemia-reperfusion injury in dogs, H88
platelet surface, effects of nitric oxide on, H1640

Senescence, see Aging**Sepsis**

see also **Shock, septic**
myocardial morphometric changes in, H1446

Serpins

LEX-032, attenuation of myocardial reperfusion injury in cats, H881

Shear rates

leukocyte rolling velocity and, H1371
in pial arterioles, during sciatic nerve stimulation, H1712

Shear stress

and flow-induced detachment of adherent platelets from fibrinogen-coated surface, H160
in pulmonary vasoreactivity, H1757
and red blood cell aggregability, in β -thalassemia major, H1951
and vascular growth, H364

Shock

circulatory, see **Shock, hemorrhagic**
hemorrhagic beneficial effects of nonanticoagulant heparin after, H1294
nitric oxide in, in rats, H1616
systemic and microvascular Po₂ dissociation during, H827
septic, cardiac function during, effects of nitric oxide synthase inhibition on, H1979

Shortening deactivation

in cardiac muscle, H338, H1101

Signal transduction

in IL-1-induced nitric oxide production by cardiomyocytes, H1864

Sinoatrial node

pacemaker activity, stretch-induced increase of calcium mobilization in, H1726
chloride channels in, H1726
pacemaker cells, tetrodotoxin-sensitive sodium current in, H2108

Sinus node

automaticity, effects of ATP on, H1785

Skin

blood flow, during exercise, effects of cooling on, H208

Sleep

vascular resistance changes in, in swine, H723

Smoking

and pathogenesis of atherosclerosis, H1624

Sodium/calcium exchanger

activity in cardiomyocytes during metabolic inhibition, extracellular pH and, H2149

Sodium channels

in cultured human atrial myocytes, H1676
development, cAMP and, H194
human cardiac site-directed mutagenesis of, H2029
tetrodotoxin blockade of, gating-dependent, H2029
L-type, in guinea pig ventricular myocytes, H620

tetrodotoxin-sensitive, in sinoatrial node pacemaker cells, H2108

Sodium/hydrogen exchanger

intracellular alkalosis induced by, in negative lusitropism of α_1 -adrenoceptor stimulation, H701
in myocardial reperfusion, H957
NHE-1, promoter, regulation in mammalian myocardium, H259

Sodium/hydrogen exchanger inhibitors

cardioprotective efficacy of, extracellular buffer composition and, H692

Sodium intake

effect on midwall left ventricular mechanics in hypertensive rats, H628

Sodium ions

homeostasis, cytoplasmic phosphates and, in rat heart, H1302
intracellular, in myocardial reperfusion, H957
sympathoexcitatory and pressor responses to, in brain, cerebral angiotensin II and, H275

Sodium nitroprusside

and myocardial contractility, in situ canine hearts, H1568

Sodium-potassium ATPase

- cytoplasmic phosphates and, and sodium-potassium balance in rat heart, H1302
- differential stimulation by insulin and nitric oxide, in rabbit aorta, H1278
- and hypoxic cerebral blood flow, H45
- in reperfusion ventricular fibrillation, H957

Spaceflight, see Microgravity**Spectral analysis**

- auto- and cross-, in investigation of cardiovascular fluctuations during pentobarbital anesthesia, H575
- of heart rate, in sleep, in swine, H723
- in investigation of heart rate and blood pressure variability, H1672
- in investigation of vagal cardiac electrophysiology, H1381

Splanchnic nerve

- stimulation, induction of cardiovascular reflexes by, H849

Splenic artery

- remodeling, in response to locally altered blood pressure, indicial functions of, H1323

Stress

- sympathetic neural reactivity to, sex differences and, H340

Stress protein

- cytokine-induced expression of, in feline cardiomyocytes, H1231

Stroke volume

- determinants of, H2050

Substance P

- atrial natriuretic peptide release stimulated by, in neonatal rat ventricular myocytes, H935

Superoxide anion

- and cerebrovascular effects of vasopressin, after brain injury, H1272
- and coronary artery oxygen-elicited responses, in calf, H1044
- efflux, and reoxygenation injury of endothelial cells, H945

Sympathetic nervous system

- see also Renal sympathetic nerve activity*
- baroreflex-mediated inhibition, vasopressin and, H1963

Syrian hamster, see Golden hamster**T****Temperature**

- and cardiac calcium transport mechanisms, relative contributions to cardiomyocyte relaxation, H1772

Temperature, body

- effect on myocardial infarction, in swine, H1189

Temperature, skin

- in control of skin blood flow during exercise, H208

Tetrodotoxin

- gating-dependent blockade of human cardiac sodium channels, H2029

Thalassemia

- β -thalassemia major, enhanced red blood cell aggregability in, H1951

Thermodynamic analysis

- of relationship between pressure-volume area and myocardial oxygen consumption, H730

Thiols

- nitrosation, in pulmonary arterial relaxation caused by nitrogen dioxide, H1038

 α -Thrombin

- effects on ventricular function, in isolated guinea pig heart, H1585
- inotropic effects of, H1585

Thrombin receptors

- activating peptide SFLLRN, H1585
- and response to α -thrombin in isolated guinea pig heart, H1585
- vascular smooth muscle cell, surface thrombomodulin and, H603

Thrombomodulin

- surface, modulation of thrombin receptor responses on vascular smooth muscle cells, H603

Thromboxane

- derived from mast cells, in inosine-induced vasoconstriction, H560

Thyroid hormones

- effect on SERCA 2 expression in chick embryo cardiomyocytes, H638

Transferrin

- receptor-mediated transcytosis through blood-brain barrier endothelial cells, H1149

Transgenic mice

- see also Knockout studies, in mice*
- with annexin VI overexpression in heart, cardiomyocyte function in, H1091

Triakis semifasciata, see Leopard shark**Tricarboxylic acid cycle**

- activity after ischemia, H72
- anaplerotic enrichment substrate, H2197
- in vascular smooth muscle, H1869

Tumor necrosis factor

- TNF- α
- and cardiac depression in rabbits, H485
- heat shock protein 72 expression induced by, in feline cardiomyocytes, H1231
- release in hypertensive rats, H2125

Tyrosine kinase

- regulation of calcium influx into coronary endothelium, H267
- signal pathway, and flow-induced vasodilation in coronary arterioles, H1878

U**Ultrasound**

- ATP-triggered, in dog
- electrophysiological-anatomic correlates of, H1785
- role of cardiac afferents in, H1785

Vagus nerve

- cardiac activity, psychosocial influences upon, H1381

- stimulation, effects on heart rate variability, H2081

Vascular cell adhesion molecules

- VCAM-1, expression in endothelial cells, H807

Vascular endothelial growth factor

- administration in chronic myocardial ischemia, H1791
- in cardiac angiogenesis, H1791, H1803
- flt-1* and *flt-1* receptor binding, in rat myocardial infarction model of angiogenesis, H1803
- isoforms, H1803
- mitogenic effect on coronary venular endothelium, nitric oxide and, H411

Vascular networks, see Microvascular networks**Vascular perfusion system**

- pulsatile, for ex vivo investigations, H760

Vascular smooth muscle, see Muscle, smooth, vascular**Vascular tone**

- and responses in feline pulmonary vascular bed, adenosine A_1 and A_{2a} receptors in, H200

Vasculogenesis

- in fetal heart, H33

Vasoconstriction

- see also Vasoreactivity*
- angiotensin II-induced, vascular smooth muscle cAMP and cGMP in, H1914
- inosine-induced, secondary mast cell mediators in, H560
- microvascular, mediation by α -adrenoceptor subtypes, H710
- pulmonary
- anoxic, vasodilator effect of nitric oxide in, H974
- induced by α -adrenoceptor activation during exercise, reversal of, H875
- renal, muscle chemoreflex and, H951
- stress-induced
- in rat mesentery, neuropeptide Y Y_1 receptors in, H796
- sex differences and, H340

Vasodilation

- see also Vasoreactivity; Vasorelaxation*
- cerebral
- cGMP-mediated, ATP-sensitive potassium channels in, H423
- endothelium-dependent dilation, laser-dye impairment of, singlet oxygen and, H1258
- vasopressin-induced, effect of brain injury on, H1272
- coronary
- β_1 -adrenoceptor-induced, pinacidil and, in dogs, H2210
- endothelium-dependent, platelet-activating factor and, H2094
- flow-induced, H1878
- metabolic, in dogs, H2210
- flow-induced
- in coronary arterioles, H1878
- nitric oxide-dependent, H99, H442, H1878
- insulin-induced, in skeletal muscle arterioles, H2120
- pial arteriolar, calcitonin gene-related peptide receptors and, H317
- pial artery
- ATP-sensitive potassium channels in, H423

- nitric oxide and opioids in, relationship between, H869
 vasopressin-induced, effect of brain injury on, H1272
 postischemic, in human forearm, nitric oxide and, H1435
 pulmonary
 after chronic hypoxia, H888
 and nitric oxide inhalation, in cat, H974
 in skeletal muscle
 insulin-induced, H2120
 in response to stimulation, ATP-sensitive potassium channels in, H1649
 venous, acetylcholine- and flow-induced, H99
- Vasopressin**
 and baroreflex control of vascular resistance, H1963
 and central pressor action of angiotensin II, H167
 cerebrovascular effects, effect of brain injury on, H1272
 inhibition of nitric oxide, and atrial natriuretic factor secretion in isolated rat heart, H306
 pulmonary arterial response to, after chronic hypoxia, H888
- Vasoreactivity**
see also Vasoconstriction; Vasodilation; Vasorelaxation
 calcium-dependent, H1101
 cutaneous, effect of temperature on, H208
 endothelin-1 and, H7, H16
 endothelium-dependent
 after ischemia-reperfusion, H1634
 agonist- and flow-induced, H99
 arachidonic acid metabolites and, H1021
 in athletes, H2008
 hyperglycemia and, H2014
 insulin and, in skeletal muscle arterioles, H2120
 intracellular calcium and, H2038
 and long-term exposure to oxygen radicals, H2184
 and lung allograft rejection, H2191
 platelet-activating factor and, H2094
 singlet oxygen and, in cerebral arterioles, H1258
 load-dependent, H1101
 in peripheral vascular bed, angiotensin and, H1172
 postischemic
 calcium channel activity in, H1484
 in forearm, H1435
 pulmonary
 adenosine receptors and, H200, H610
 after chronic hypoxia, H888
 during exercise, H875
 with inhaled nitric oxide, H974
 nitrogen dioxide and, H1038
 at varied pH, endothelium-derived relaxing factor and, H252
- Vasorelaxation**
see also Vasodilation; Vasoreactivity
 coronary artery
 cyclopiazonic acid-induced, in pigs, H2038
 nitric oxide-mediated, and antenatal betamethasone therapy, H538
 by endothelium-derived metabolite of arachidonic acid, H1021
 pulmonary arterial, caused by nitrogen dioxide, via thiol nitrosation and nitric oxide formation, H1038
 temperature and calcium transport mechanisms in cardiomyocytes and, H1772
- Vein**
 vasodilation, acetylcholine- and flow-induced, H99
- Ventricles, *see* Heart ventricles**
- Ventricular fibrillation**
 reperfusion, pathophysiology, H957
- Ventriculoarterial coupling**
 effect of dobutamine on, in regional myocardial ischemia in dogs, H1279
 mathematical models for, H2050
- Venules**
 constriction, mediation by α -adrenoceptor subtypes, H710
- Verapamil**
 effect on calcium waves and calcium transients in rat ventricular myocytes, H907
- Vitamin D**
 and smooth muscle contraction in resistance arteries, H230
- W**
- Water transport**
 and aquaporin-1 in lung endothelium, H416
- Weightlessness, *see* Microgravity**
- White blood cells, *see* Leukocytes**
- Windkessel model**
 in arterial impedance study, H1597
 five-element, H376
 three-element, H2050
- X**
- Xanthine oxidase**
 and cyclic flow variations in canine coronary arterial thrombosis, H1993
 and platelet aggregation in canine coronary arterial thrombosis, H1993
